

Overview

Korea Eco-labelling Program is an voluntary certification program to choose eco-products

- from the products for the same purpose and display the designated logo (Eco-Label) and brief description.
- in order to reduce consumption of energy and resources and to minimize generation of pollution substances
- in each production step (raw material acquisition → production → distribution → application → disposition).
- “Eco-Label” transfers a type of information to let buyers and consumers know that products with the Eco-Label are eco-products.
- Producers or sellers can utilize the Eco-Label certification as the marketing means for their products.

※ Ultimately, the eco-labeling program provides consumers with accurate information about eco-products, and encourages companies to develop and produce eco-products in line with the consumer preferences, in order to search for sustainable development.

- Korea Eco-labelling Program has been conducted from April 1992**, certifying Eco Labels to qualifying eco-products for excellent quality and performance, as well as general environment-friendliness during the entire production process.

- Korea Eco-labeling program is a certification program executed by the Ministry of Environment, in line with Article 20 of the 「Act on Environmental Technology Development & Support」.
- The "eco" of the Eco-Label refers to ecological and economic.
- At the bottom of the label, the reasons for certification must be displayed as specified in the Eco-Label Certificate issued in accordance with provisions under Article 23-2 of the Enforcement Ordinance of the 「Act on Environmental Technology Development & Support」.

※ In addition, Eco-Label certified products are target products that public agencies are obligated to purchase from July 2005, in compliance with Act on the Promotion of the Purchase of Environment-Friendly Products.

Korea Eco-labelling Program is undertaken by governments and agencies in approximately 40 countries, including Korea, EU, Nordic Council, Canada, Japan.

- Internationally, an international association of eco-labelling program operating agencies, Global Eco-labelling Network (GEN) has been organized. Korea joined GEN in 1997, and has been an active member since.
- Act on the Promotion of the Purchase of Environment-Friendly Products

Program Operation

- The Ministry of Environment and KOECO are in charge of operating the Eco-labelling program.
